

# Spray-N-Grow Foliar Feeds - Directions for Use on Hydroponically Grown Plants

## Dilution Rates

<i>All foliar dosage rates listed in ml/gallon</i>	Clones and Seedlings	Rooted Clones and Early Growth (Pre-Veg)	Early Vegetative Growth	Late Vegetative Growth	Bloom Week 1	Bloom Week 2	Bloom Week 3
<b>Spray-N-Grow</b>	30 ml	30 ml	30 ml	30 ml	30 ml	30 ml	30 ml
<b>Coco-Wet</b>	2.5 ml	2.5 ml	2.5 ml	2.5 ml	2.5 ml	2.5 ml	2.5 ml
<b>Bill's Perfect Fertilizer</b>	0	0	0	5 ml	10 ml	12 ml	15 ml

- Use lukewarm water (80-100° F/27-38° C)
- One gallon of mixture product will treat 500-700 sq. ft.
- Adding Bill's Perfect Fertilizer to Spray-N-Grow and Coco-Wet during bloom increases flower bulking
